SUMMARY

Full-Stack Developer with 1+ year of experience in Next.js, React.js, Node.js, TypeScript, and MERN Stack. Skilled in REST APIs, WebSockets, MongoDB, MySQL, Redis, AWS, and modern frontend frameworks. Currently expanding expertise in System Design and DevOps while delivering client projects as a freelance web developer.

EXPERIENCE

Full Stack Developer

Medisetu | May 2026 – Present

- Contribute as a core engineering team member in developing and scaling a healthcare SaaS platform for appointment booking, patient management, and laboratory operations.
- Lead the development of a Lab Appointment Management module, enabling test booking, appointment scheduling, patient workflows, and laboratory administration.
- Optimize backend APIs, database queries, and application architecture, reducing response latency and improving platform performance and scalability, Now used by 10+ labs in Jaipur.
- Refactor and modernize existing codebases, improving maintainability, code quality, and development efficiency across the platform.

Full Stack Developer

Kuchoriya TechSoft | Jan 2026 – May 2026

- Designed **multi-tenant architecture** with isolated databases per company
- Built and maintained 30+ REST APIs using Node.js, Express.js, JWT Authentication, and RBAC, supporting 5+ user roles and secure access control across the platform.
- Integrated HLS (m3u8) adaptive video streaming and AWS S3 storage, supporting large media files (5GB+) and delivering optimized playback experiences across devices and network conditions.

MERN Developer

Bharg IT Solutions | Jan 2024 – June 2024

- Developed and scaled a real-time betting platform using React.js, Node.js, Express.js, and MySQL, supporting high concurrent users during live events.
- Implemented React Query for server-state management, caching, background data synchronization, and request deduplication, significantly improving data-fetching efficiency and application responsiveness.
- Optimized page load performance and reduced content shifting (CLS) by leveraging React Query caching strategies, prefetching, and efficient API consumption patterns.

PROJECTS

Lab Management System (Medisetu product)

- Developed lab management system for labs, so that they can book the test, store the report, and manage there billing, with ABDM compiled, so that in m3 approval can store data to govt central database, to track user health data, currently used by 10+ labs in Jaipur.

Blood Finder (Smart India Hackathon)

- Developed a web application that helps users locate the nearest blood bank during emergencies and connects them directly, reducing the time and effort required to find blood.

EDUCATION

- **Master of Computer Application (MCA)**, JECRC University, Jaipur Aug'2024 – July'2026
- **Bachelor of Computer Application (BCA)**, JECRC University, Jaipur Aug'2021 – July'2024

SKILLS

- **Core Concepts:** Object-Oriented Programming, Software Development Life Cycle, Database Management Systems, Authentication and Authorization.
- **Languages:** JavaScript, Python, PHP
- **Frontend:** HTML, CSS, TailwindCSS, Bootstrap, React.js, Next.js, Redux, React-Query, Recharts
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, MongoDB, MySQL, PostgreSQL, Redis
- **Other tools:** Git, GitHub, Figma, Excel, FFmpeg, AWS S3,SQS Jupyter Notebook, Hostinger, WordPress, Cloudinary, Render, Netlify
